#### **Customize your backpack**

Nuria Robles | Fab Lab León

28-5-2021

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101006203.

# What are we learning today?

We will customize our backpack with thermal vinyl and a silhouette that we will design in Inkscape. We will use vinyl leftovers to make colorful creations.

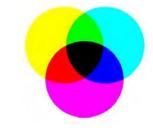

#### How to use a new tool in inkscape: Text

Chest Story Book Story Manual Story Barrier Story Manual Story Story Control Story Story Story Story Story Manual Story Story Story Manual Story Story Story Manual Story Story Story Manual Story Story Story Story Manual Story St

How to select the text font and change dimensions of the canvas

How the vinyl cutter works and how to peel off the vinyl sticker

We will make a collage with vinyl leftovers to create a cool design.

## First step: Let's open the Inkscape app and defining the maximum size of the maximum for the text.

#### Step 1: Setting document size: 230 x 100 mm

#### File > Document properties

Page tab - Custom size

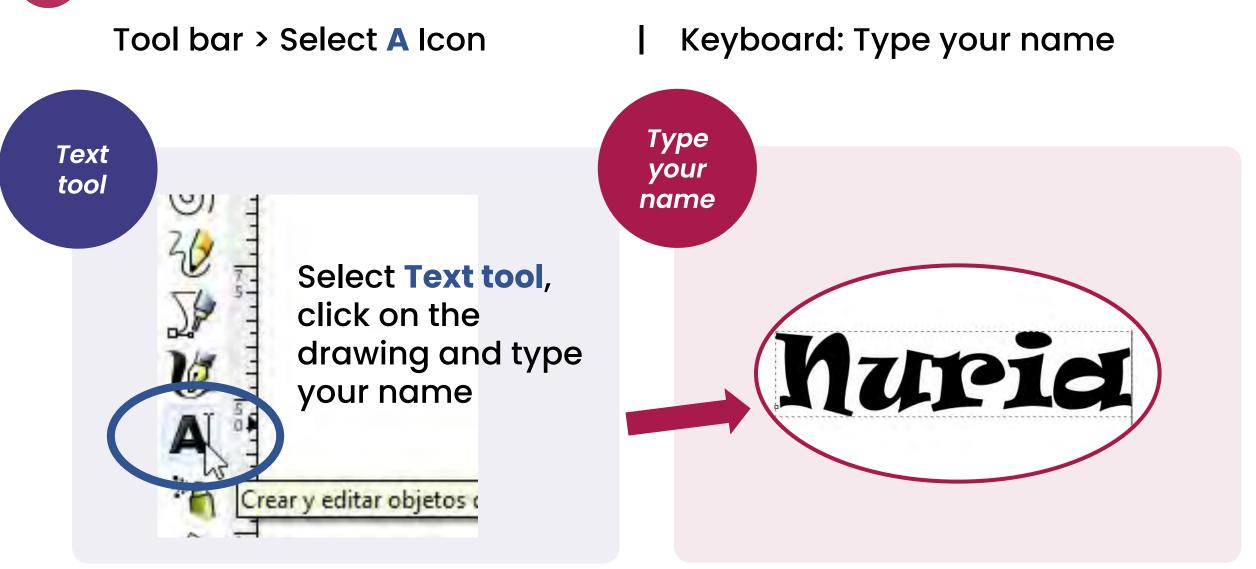

Custom Doc New document 1 - Inkscape Document Properties (Shift+Ctrl+D) X properties size File Edit View Layer Object Path Text Filters Ex Document Properties (Shift+Ctrl+D) A (X) Ctrl+N X: 0.000 New New from <u>Template</u>... Ctrl+Alt+N Page Guides Grids Snap Color Scripting Metadata License Open... Ctrl+O General **Open Recent** Display units: mm 🖂 Revert Page Size Save Ctrl+S Shift+Ctrl+S 210.0 x 297.0 mm Save As... A4 Shift+Ctrl+Alt+S Save a Copy... **US** Letter 8.5 x 11.0 in - Import... Ctrl+I US Legal 8.5 x 14.0 in Export PNG Image ... Shift+Ctrl+E **US** Executive 7.2 x 10.5 in Import Clip Art... 10 0110 - 11000 -----Width: 230 mm O Portrait 
Landscape Orientation: A Print... Ctrl+P Height: 100 mm Custom size 💰 Clean up document Width: 230.00000 Units: mm 🗸 Document Properties... Shift+Ctrl+D Height: 100.00000 X Close Ctrl+W ■ Resize pac to content... 📲 Quit Ctrl+Q A 2B

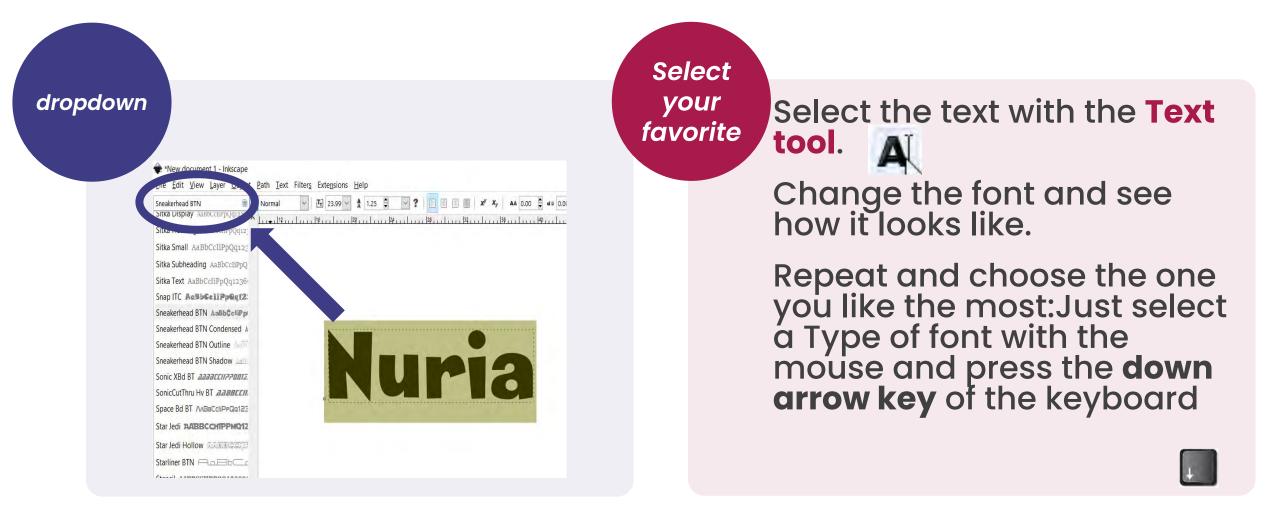

### Next step: Let's type!! We will learn how to insert text, and how to select the font we like the most.

#### Step 2: Let's type our name using the Text tool

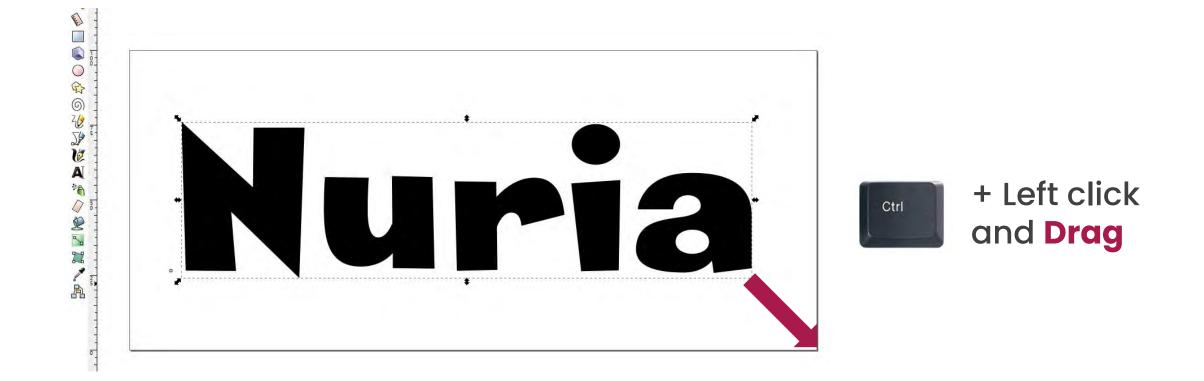

#### **Step 3: Let's change the font**

Toolbox > choose from dropdown | Keyboard: Type your name

### **Step 4: Set the size to the document size**

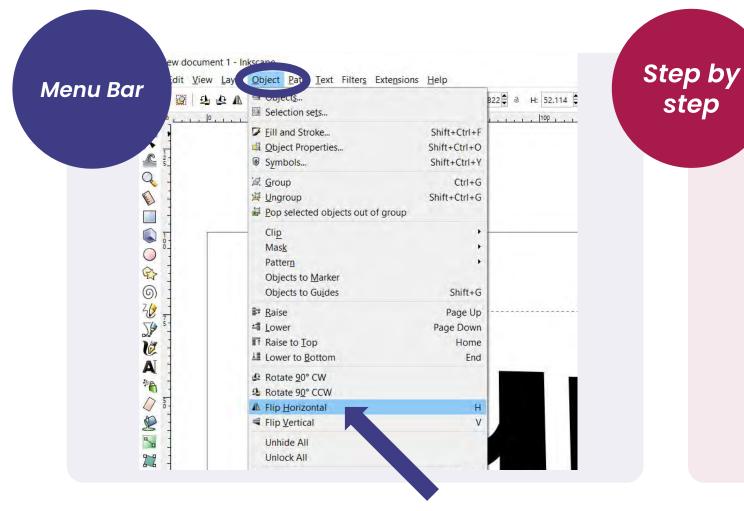

## Now we are going to prepare it to be able to make a textile sticker: MIRROR

#### Menu bar > Object > Flip Horizontal

1. Select the vector with the Select tool. .

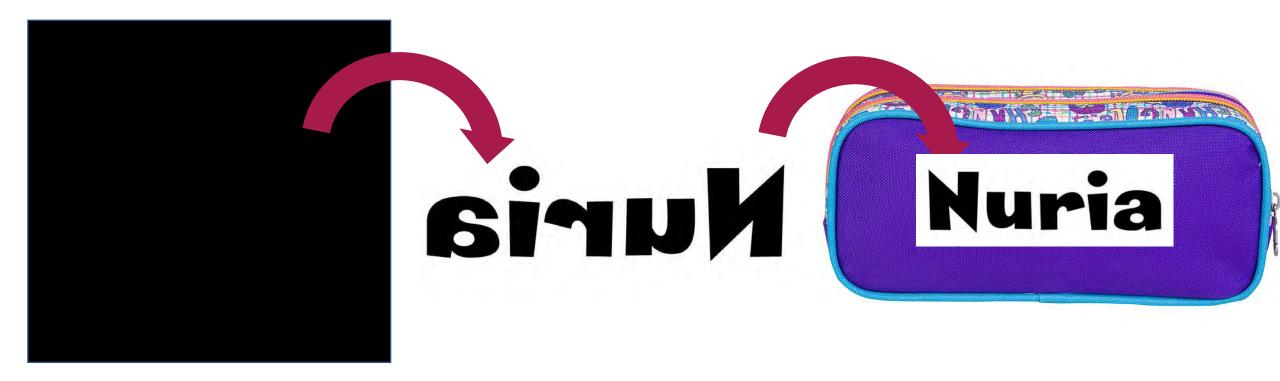

2. Go to Object > Flip Horizontal.

step

3. The vector will be mirrored

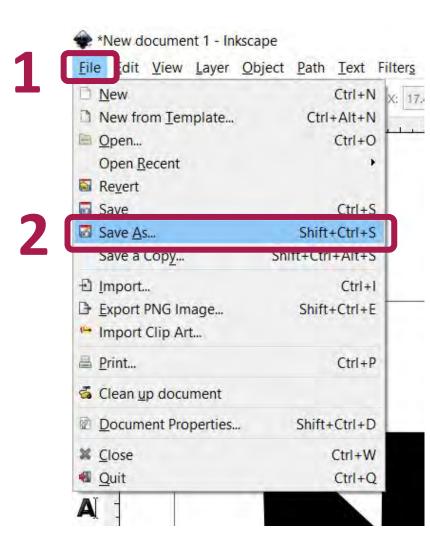

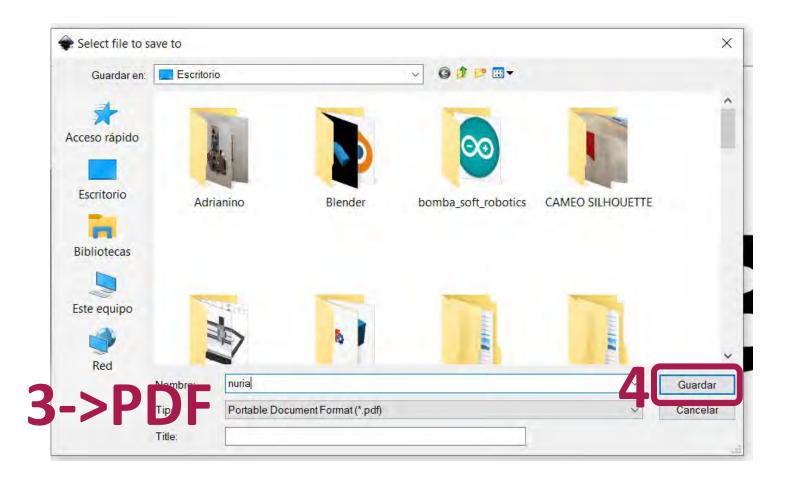

# Remember: We will "Save as " (.pdf) format so that the vinyl cutter recognizes the design file

### Step 6: The workflow for the vinyl cutter

## In the meanwhile, lets customize the bag with colors using textile vinyl leftovers

#### Menu bar > Object > Flip Horizontal

The thermal vinyl has to be cut and placed on the fabric correctly. For this, you must difference the 2 sides:

- Transfer side: The sheet that will be not cut. It is usually a bright sheet

- Vinyl side: The part that will be stuck to the fabric

# Final step: Place the color cuts on the backpack and iron them in the Heat press

# Use your creativity to make your own creation
